

Your Ears

The Parts of Your Ear

Outer ear

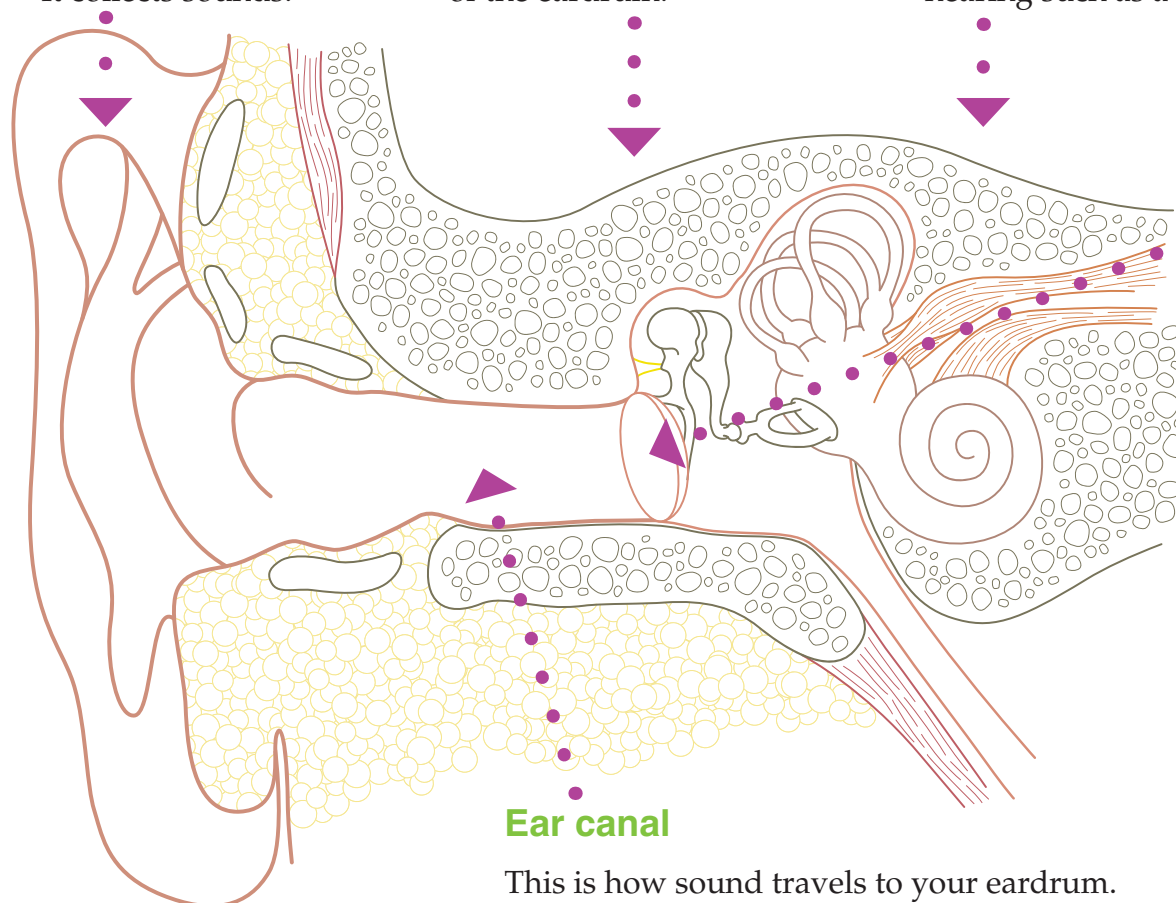

This is the part you can see.
It collects sounds.

Middle ear

It changes sound into vibrations with the help of the eardrum.

Inner ear

It creates nerve signals that tell your brain what sound you are hearing such as a song.

Eardrum

It vibrates from the sound that is traveling to the inner ear.

Ear canal

This is how sound travels to your eardrum.
